Kapurthala, Punjab, India

EDUCATION

- IK Gujral Punjab Technical University** Kapurthala, India
 - B.Tech in Computer Science and Engineering; CGPA: 9.41 / 10 (6th sem)* 2023 – 2027

TECHNICAL SKILLS

- Languages:** Python, SQL, JavaScript, C++
- Generative AI & Agentic AI:** LangChain, LangGraph, LiveKit Agents, RAG, Hybrid RAG, GraphRAG, MCP, Multi-Agent Systems, AI Evals, LLMs, Embeddings, HuggingFace, Groq, STT/TTS, Voice Agents
- AI / ML:** Scikit-learn, XGBoost, Transformers, Deep Learning, Fine-tuning, NLP, Computer Vision, Neural Networks, SHAP
- Backend & AI Infrastructure:** FastAPI, Flask, PostgreSQL, ChromaDB, Supabase, pgvector, REST APIs, Docker, Git, Playwright, BeautifulSoup, Model Serving
- Data:** Pandas, NumPy, EDA, Feature Engineering, Matplotlib

EXPERIENCE

- Resolute AI Software**
 - Gen AI Intern* Jun 2026 – Present
 - Lead Generation Automation:** Built an AI-powered lead generation feature that takes a company website as input and extracts **headquarters and branch locations** using **Python, Playwright, BeautifulSoup, and LLMs**.
 - AI Engineering:** Developing **LLM-powered automation workflows** for web data extraction and experimenting with **Generative AI and Computer Vision** models for classification and defect detection.
- Kountr**
 - Founder / Developer* 2026
 - POS & Billing System:** Built and sold an offline restaurant POS and billing system, leveraging Codex and Claude Code for rapid software development.
- EduNet Foundation (AICTE + IBM)**
 - AI & Machine Learning Intern* Jun 2025 – Aug 2025
 - Machine Learning:** Built an ML pipeline achieving **87.6% accuracy** through preprocessing, feature engineering, and model evaluation.

PROJECTS

- ServiceFlow: Real-Time Voice AI for Field-Service Operations** Demo | [GitHub](#)
 - LiveKit Agents, Supabase PostgreSQL, Gemma 4 31B, Deepgram, Fish Audio*
 - Voice AI:** Built a real-time voice agent handling service triage, booking, rescheduling, cancellation, technician matching, and dispatch with streaming voice interactions and barge-in support.
 - Engineering:** Implemented deterministic scheduling tools, customer context, safety escalation, and failure recovery; achieved [**900ms TTFA**] and [**1.5s P95 response latency**] in LiveKit testing.
- Agentic Intelligence Toolkit for an AI-Focused VC Firm** Live | [GitHub](#)
 - LangGraph, FastAPI, Groq, Supabase pgvector, React/Vite*
 - Agentic AI:** Built three independent LangGraph systems—**Corridor Atlas** for market intelligence, **AI MoatLens** for competitive analysis, and **SwarmSpace Navigator** for multi-agent ecosystem mapping—with semantic retrieval and a full-stack FastAPI + React/Vite interface.
- Pragya AI: Industrial Knowledge Reasoning Engine** Demo | [GitHub](#)
 - FastAPI, LangGraph, Neo4j, Supabase pgvector, Groq, React/TypeScript*
 - GraphRAG:** Built a hybrid GraphRAG platform combining Neo4j and pgvector for multi-document reasoning across industrial SOPs, regulations, maintenance, and compliance documents.
 - Agents:** Implemented parallel retrieval agents with OCR, entity extraction, intent routing, citations, and streaming responses.
- PranRakshak AI: Intelligent Hospital Command Center** Live | [GitHub](#)
 - FastAPI, LangGraph, RAG, SHAP, Groq, PostgreSQL, React/Vite*
 - ML System:** Built a real-time sepsis early-warning system using **40K+ ICU records**, Sepsis-3 criteria, and a patient-priority queue for clinical triage.
 - Safety:** Added SHAP-based risk explanations and a RAG copilot with strict separation between OCR lab reports and ML predictions.

ACHIEVEMENTS & LEADERSHIP

- Finalist, Hack On Hills – NIT Hamirpur
- Top 10 Finalist, NIT Jalandhar Hackathon
- Top 5 Finalist, LPU Hackathon
- 3rd Prize, University Startup Competition
- Founder, Upstarts – Technology & Startup Club, IKGPTU
- Class Representative**, CS Department, IKGPTU
